Bob:

Attached is a list of people that came and picked up containers off the CES – Houston facility (possible RPs?). Also, I have been in contact with Gary Porter (EPA CID). They currently have the records for CES but indicated that they may not be able to give us those records until they complete the court case. They do have records of people that supplied material to the CES facility. My thought is that the materials was sent to CES for reuse/recycle and since the material may have not been processed that this waste is now subject to CERCLA and these guys are likely PRPs. The big problem is that I am not sure that we can wait to take action.

We may be able to take a limited action which would be to organize and recontainerize but the fact that the property is surrounded by residents and a school, this does not seem to be the wisest choice of action. I think we would probably go ahead and dispose and we deal with the PRPs after the action.

Thanks

Gary Moore
